

Liberal Democrats

My name is Rachel Fernandes and I am representing the Liberal Democrats. We are the party that will build a brighter future for Britain. We will stop Brexit and invest the £50 billion Remain Bonus into UK public services and tackling inequality. We promise to address the climate emergency that our planet is facing by generating 80% of energy from renewable resources by 2030. Our party will drive Britain's education system forward with £10 billion investment per year as well as the recruitment of 20,000 more teachers to ensure our youth have a brighter future. In addition to this, the Liberal Democrats will invest an extra £6 billion into the NHS and reduce waiting times. We understand the importance of treating mental health with the same urgency as physical health so we will subsidize mental health services more. In summary, the Liberal Democrats are the party that has a progressive plan for the future of our country, where every person, every community and our planet will thrive.
